Delivery Management Platform

Branch management

Unlimited branches

We know you will operate with multiple branches in different locations. So you can create unlimited branches

Splitting work load

You can allocate the area where the branch operate. (e.g. Mandalay area, Bago area, etc.)

Unique administration

You can create a branch account, so they can operate with their merchants and deliverymen

Unique deliverymen

You can allocate specific deliverymen for the specific branches

Way management

Pickup and delivery
Our platform is especially design for pickup and delivery ways

Automatic scheduling
Deliverymen are automatically assigned for pickup and/or delivery

Live Tracking
You and your merchants can track the ways anytime

QR code and waybill printing
Every way has unique QR code, so you can print the slip with QR code and stick on the parcel

Failed way management
Put it back, re-delivery or return to shipper

Automatic GPS Navigation

Built-in GIS system

- Thousands of street coordinate locations (latitude, longitude), ward locations and POIs are included in the Gelivery. This means that your deliverymen will know easily the recipient locations on the Map.
- Our own GPS Navigation system will lead your deliveryman to the destination.
- Your deliverymen always thinking who is the nearest customer and where are the next points. Don't be headache, the AI (Artificial Intelligence) based Route Optimizers will be included soon.
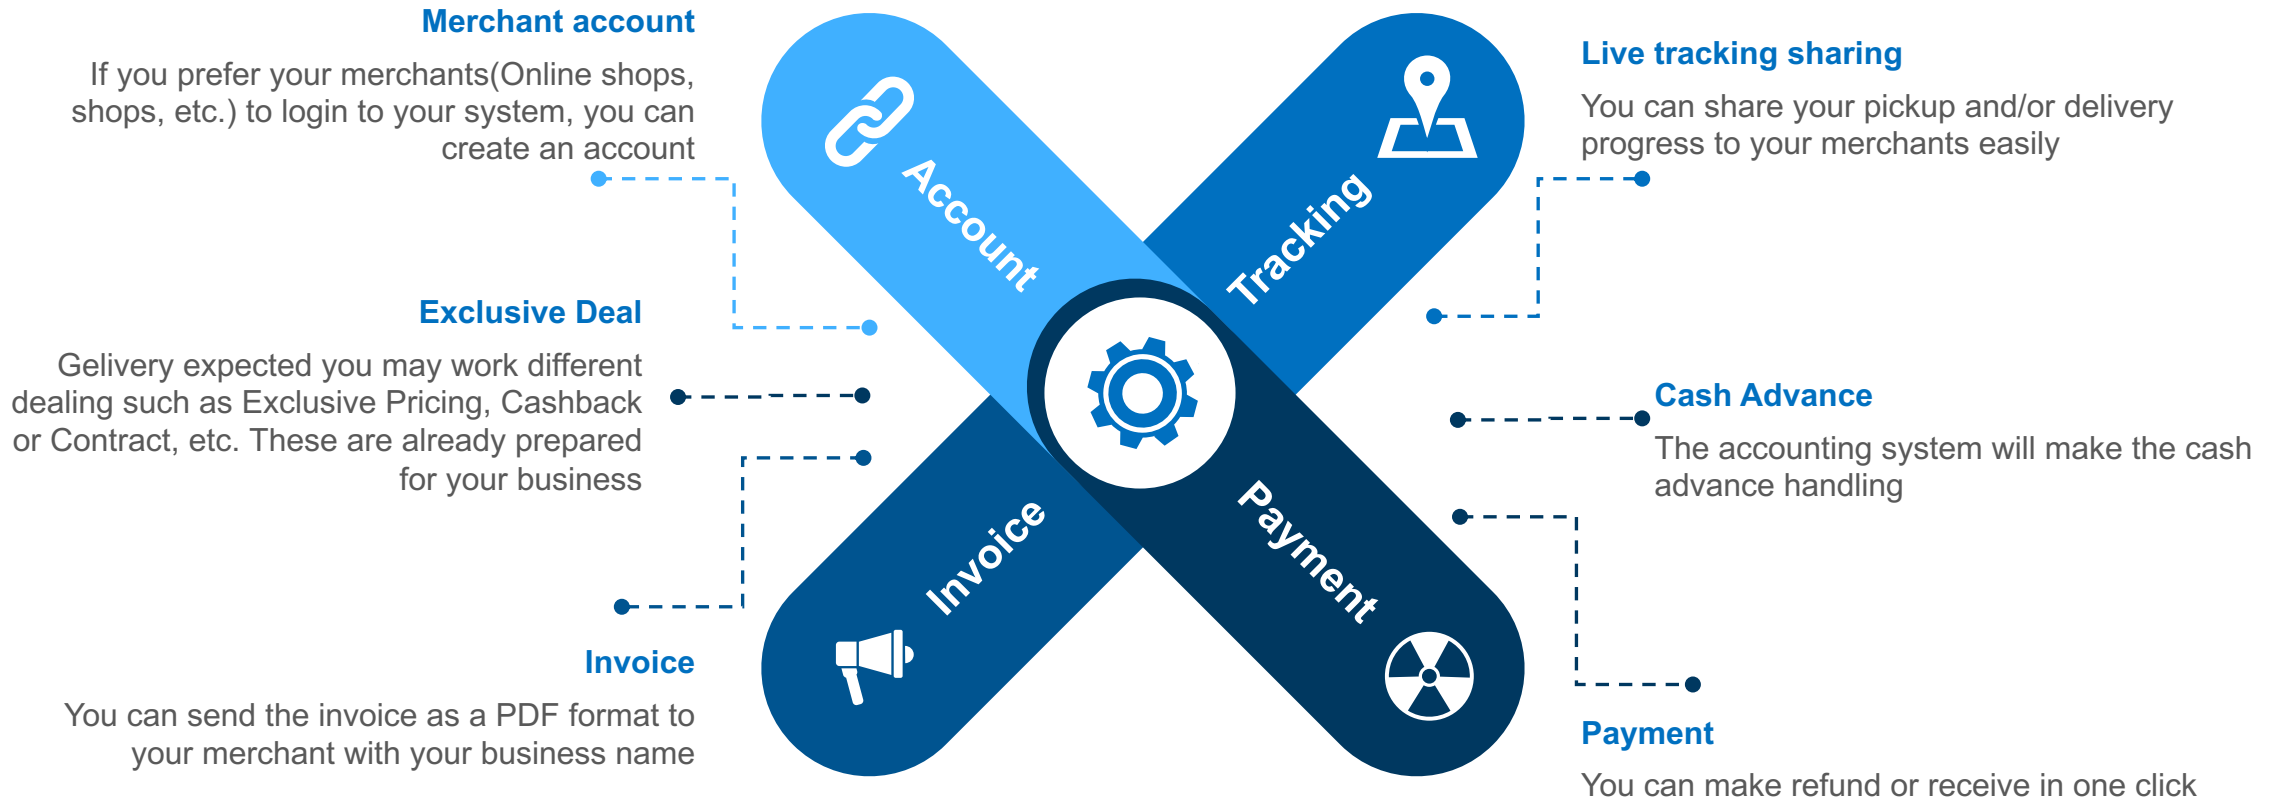

Multiple transits
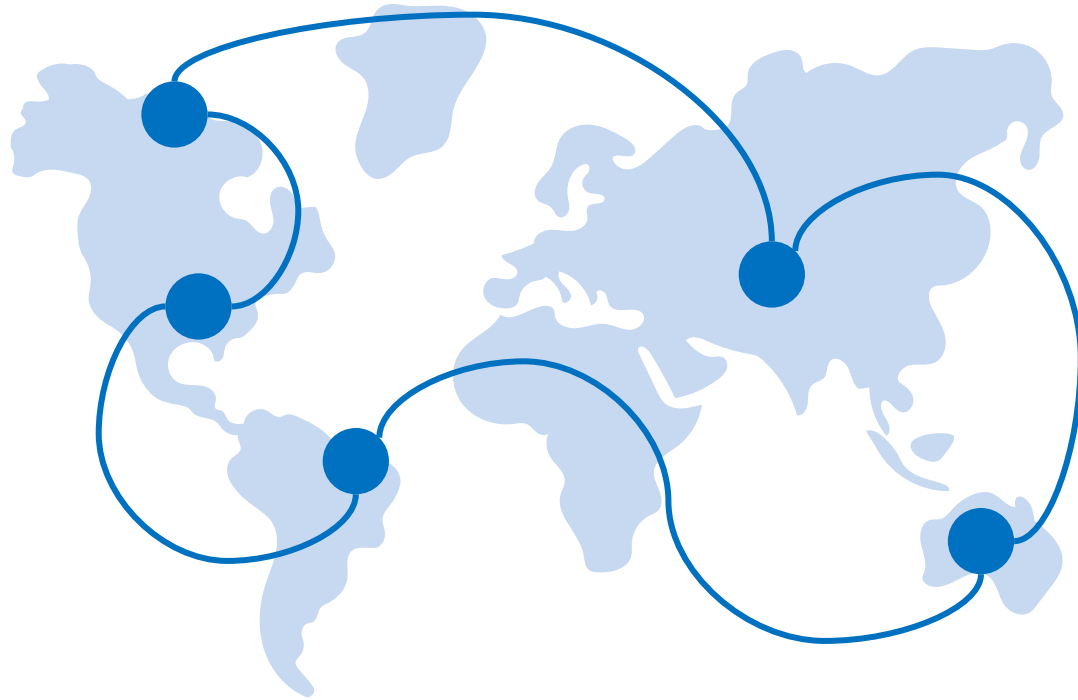

Automatic transit suggestion

Do you have any plan for multiple transit points and warehouses? Gelivery's AI System will calculate the best routes based on modern algorithms

Merchant(OS) management

Merchant account

If you prefer your merchants(Online shops, shops, etc.) to login to your system, you can create an account

Exclusive Deal

Gelivery expected you may work different dealing such as Exclusive Pricing, Cashback or Contract, etc. These are already prepared for your business

Cashback promotion

You can create multiple cashback promotion packages

Special prices

You can create the special price package for your merchants

Station/warehouse management

Multiple station/warehouse locations

Bucket labeling with deliverymen or towns.

Automatic bucket allocation for Pull and Put. Easy to check the parcels in the buckets over the Internet.

QR based station/warehouse In/Out
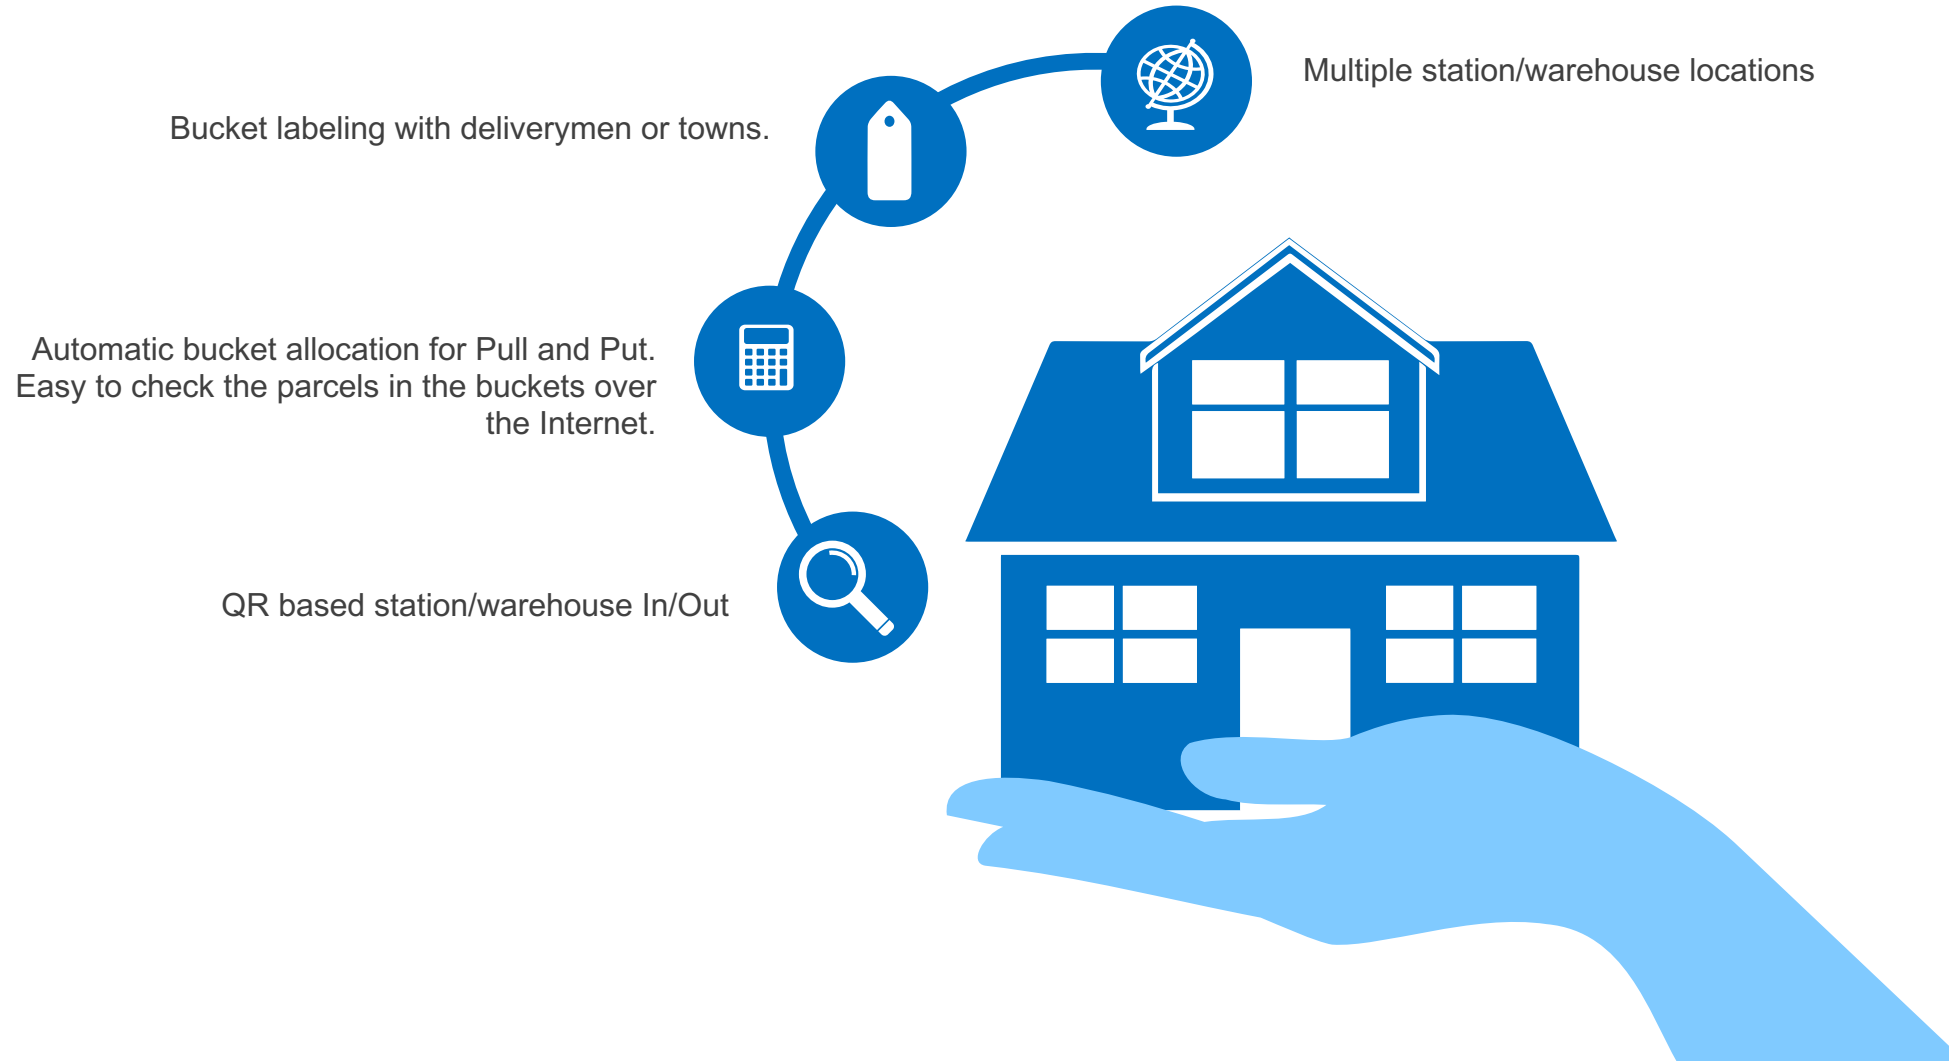

Camera/CCTV based Parcels In/Out management

Face recognition and QR reading AI Camera

- When your deliverymen come into your station, the AI system will detect who they are

- System extracts the parcel list information which is related to them automatically

- When the parcels are come from OS, AI system notify to the station operator and suggest the process to the operator. This is parcel received into the station.

- When the parcels are come from other stations, just show the QR Code on parcel to the AI camera and then the system will suggest the operator where those parcels should be hold (especially the buckets).

- When the deliverymen are coming for delivery out going, just pull out the parcels which are shown on computer monitor or mobile screen and then show the QR code to the Camera. This is parcel take away from the station/warehouse.

- **Herein**: AI Camera is NOT the special device, it is just only your office existing CCTV camera or Webcam on computer or the camera on mobile phone. CCTV can read more than 20 parcels in one time, so faster than 20 times on Bar code reader devices.

Accounting & Payroll

Accounting

Gelivery handles with Double Entry Accounting System. This accounting system will cover not only for **delivery** also for your **entire business**. Income Statement, Journal Summary, Trial Balance, Balance Sheet and Profit & Loss reports are generated automatically
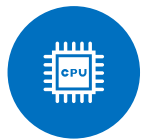

Received and/or Income
